

## Quick setup sheet

# Adding Products Sold by Weight

Meat, fish, chicken — anything sold **by the kilo**. Set it up in two places, and they must **match**:

### 1. ON THE SCALE

Give the product a number — a **PLU** — and its price per kg.

### 2. IN THE POS

Add the product and type that **same PLU** in "Scale PLU".

### 3. AT THE TILL

Clerk scans the sticker — it rings up on its own.

### The one rule

The **PLU** and the **price per kg** must be the **same** on the scale and in the POS.

## ● Example

Scale: **PLU 2 = Beef Sausages, K85/kg**. In the POS: same name, price **85** , Scale PLU **2** .

**Beef Sausages (0.620 kg) = K 52.70**

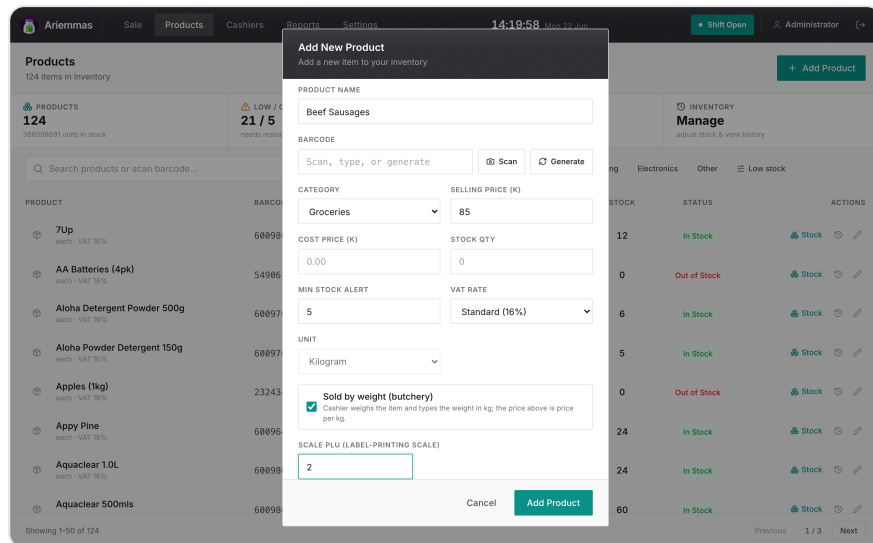

The clerk just scans the sticker — no typing. Works offline too.

Do this **once per product**. Then it works at every till.

## ● Key it into the POS

Do it on a **laptop or phone** (admin website). It syncs to all three tills.

- 1 Open **Products** → tap **" + Add Product "** (or the **pencil** to edit one).
- 2 Enter the **Name**, pick the **Category**, set **Selling Price** = price per kg.
- 3 Tick **"Sold by weight (butchery)"**. The **Scale PLU** box appears.
- 4 Type the **Scale PLU** — the same number as on the scale.
- 5 Tap **Save**.

**What it looks like.** Price per kg, "Sold by weight" ticked, and the **Scale PLU** number filled in.

## ● What each box means

**Name** What shows on the screen & receipt.

**Selling Price** Price for **one kg**. Match the scale.

**Sold by weight** Tick for anything weighed.

**Scale PLU** The product's number on the scale. Match the scale.

## ● Worksheet

Write each weighed product here as you set it up. Tick when it's done on the scale and in the POS. (First two rows are examples.)

| PLU # | PRODUCT NAME         | PRICE / KG (K) | ON SCALE                 | IN POS                   |
|-------|----------------------|----------------|--------------------------|--------------------------|
| 1     | <i>T-Bone Steak</i>  | 289.99         | ✓                        | ✓                        |
| 2     | <i>Beef Sausages</i> | 85.00          | ✓                        | ✓                        |
|       |                      |                | <input type="checkbox"/> | <input type="checkbox"/> |
|       |                      |                | <input type="checkbox"/> | <input type="checkbox"/> |
|       |                      |                | <input type="checkbox"/> | <input type="checkbox"/> |
|       |                      |                | <input type="checkbox"/> | <input type="checkbox"/> |
|       |                      |                | <input type="checkbox"/> | <input type="checkbox"/> |
|       |                      |                | <input type="checkbox"/> | <input type="checkbox"/> |
|       |                      |                | <input type="checkbox"/> | <input type="checkbox"/> |
|       |                      |                | <input type="checkbox"/> | <input type="checkbox"/> |

## ● Check & common mistakes

### Test it

Print a sticker and scan it at a till. If it says **"PLU X isn't linked,"** the numbers don't match.

### Common mistakes

- PLU different on scale vs POS.
- Price per kg different.
- Forgot to tick **"Sold by weight"**.
- Typed grams, not the price per kg.
